HIGH PERFORMANCE UV-C DISINFECTION SYSTEM

SUPERMARKET LINE

Model

## S8000

### EFFECTIVE

Very high germicidal power

### INEXPENSIVE

Low maintenance cost

### SAFE

No-touch technology

### INNOVATIVE

International patent

## WHAT IS SANYCAR

Sanycar® is a high-performance no-touch disinfection system based on UV-C rays and covered by an international patent. Thanks to its special features, Sanycar® is currently the simplest, safest and most economical method for disinfecting shopping trolleys and carts.

## WHY SANYCAR

### **Sanycar® is safe®**

It is scientifically proven that the UV-C rays within the 2537 Angstrom wavelength destroy the DNA molecular bonds of microorganisms (bacteria, viruses, fungi, algae and spores), making them harmless and preventing their growth and reproduction.

### **Sanycar® is eco-friendly**

Since it does not use any chemicals, the UV-C treatment is environmentally friendly.

### **Sanycar® is simple to use®**

Thanks to its patented system, the surface disinfection treatment is as quick and simple as turning on a light bulb. A sturdy structure, high technology components, and no moving parts further ensure the machine's long term use and reduce maintenance to a minimum.

# S8000

## TECHNICAL DATASHEET

All Sanycar® models are made entirely of AISI 304 18/10 stainless steel with Scotch-Brite™ satin finish.

For easier handling, they are equipped with four swivel wheels, two of which have brakes. All models feature a control panel equipped with a multi-function electronic timer complete with an LED display.

Installed power (watt)	800
UV-C power (watt)	270
Lamp residual time counter	✓
UV-C ray intensifier	✓
Internal disinfection temperature control	✓
Lamp switch on timer	✓
Lamp warranty (hours)	12,000
Remote control via app	✓
<b>Dimensions (cm)</b>	
Width	120
Length	240
Height	150
<b>Weight (kg)</b>	165/180
